

THE TEACHING PEDAGOGY

The Institute adopts a teaching methodology that encourages interactive and participative teaching. The focus is on development of generic and managerial skills of the students. Apart from the curriculum guest lectures, management games, role-plays and seminars are organized. These provide an excellent platform for industry interaction. Students are also encouraged to do projects in their areas of specialization. These projects are extremely helpful in toning the analytical and research skills of the students.

The teaching pedagogy includes:
